

## About us

CSL Limited is one of the largest Landfill and Recycling centres in the South East of England. Our landfill site stretches more than 40 Acres and operates 6 days per week.

We are constantly producing a full range of aggregates all of which are produced and recycled on site. Here at CSL, we understand that time is money, we therefore are able to supply materials on a same day delivery basis if required.

We are currently operating ten 8 wheel Tipper lorries, two 8 wheel Grab lorries and one Roll on Roll off Bin all of which are in excellent condition and ready to serve you.

If you do not require transport, our landfill site is still available for use. We will load you and accommodate you with the same fast and friendly service as if you were one of our own!

What ever your aggregates or landfill needs, we can accommodate you!
